For Testing Schedule and Availability Questions you May Contact: Police Chief, Michael Valenzuela
(520) 879-5601 / (520) 609-4090 Michael.a.valenzuela@pascuayaqui-nsn.gov
What you will need to know prior to visiting a testing site?

- You will be required to wear a face mask and practice social distancing
- If you are experiencing symptoms, please do not come to the testing site and contact the Tribe’s Health Department at the following numbers: (520) 879-5652 / (520) 334-7691 / (520) 879-6120 / (520) 879-6129
- Minors must always be accompanied by their parent or guardian

The testing does not take long at all. Community members and employees may choose to be tested for active COVID-19 infection via a nasal swab test. You can expect to receive the results of nasal swab testing within a week to 10 days. Community members and employees may also choose to be tested for COVID-19 antibodies via a finger prick test. Community members and employees will receive the results of their finger prick test within 10 to 30 minutes. You may choose the nasal swab, the antibody test or both. Please note the Tribe cannot and does not guarantee the accuracy of any COVID-19 antibody testing as its reliance rate is currently scientifically unproven.

If a community member or employee chooses to be tested for COVID-19 antibodies, and the test returns a positive result, they will be directed to the Tribe’s Health Department for a Rapid active infection test. The community member and employee must self-isolate until they are tested by the Health Department and the Rapid test results are returned, which should be the same day that the Rapid test is given.

Community members and employees choosing to receive the testing will need to bring their insurance coverage information to the testing. If the community member is covered by either private insurance or the Yoeme Health Plan, the insurance plan will be billed by the contracted testing provider. If a community member does not have private health insurance or the Yoeme Health Plan, no charges will be assessed for that community member’s testing.

All test data will be owned by the Tribe, not the contracted testing provider, and all biological samples taken during the testing process will be appropriately disposed of, under the direction of the Tribe's Health and Police Departments. Additionally, all community members choosing to receive the testing will be required to sign both an Informed Consent Form and a Release of Information Form.

Thank you all, and we encourage you to take advantage of this testing opportunity to help keep our community healthy and safe.
